JMSEL9	Provide statistical metrics for event analysis. These should include but not be limited to events by Inject Cell and day, events by Theme and day, Events by JMET (primary/secondary), Events by Training Objective (primary/secondary), Events by day/night, e	Automatic Statistics Calculations	Spiral 4	Open	JFCOM		7/22/2002
JMSEL1 8	MSEL numbering discipline is essential to exercise management. Number blocks are assigned to Inject Cells and the Events are numbered sequentially within the blocks. Maintaining this discipline manually is time consuming and subject to frequent errors.	Automated MSEL Numbering	Spiral 4	Open	JFCOM		7/22/2002
JMSEL1 9	Enabling Events, Key Events, and Supported Events of a "story" should be linked together in the database, allowing the MSEL Manager and/or the users to sort on the storyline to show connectivity. There should be a capability to select the storyline and c	Linking Events into Storylines	Spiral 4	Open	JFCOM		7/22/2002
JMSEL2 0	The calendar view must be able to be tailored to the exercise. The present display of a single whole month (1) wastes most of the screen space and (2) cannot display on one screen all the days of an exercise that begins in one month and ends in another.	Calendar Select Viewing	Spiral 4	Open	JFCOM		7/22/2002

JMSEL Tag	Requirement text	Name	Delivery	Status	Originator CMD	Originator Name(s)	Date Received
JMSEL2 9	Provide a capability for the Cell Chief and people in the cells to identify who has access and is a member of their cell. This would be similar to the Roles pull down table for the MSEL Manager. This should be a read only panel for the cell members.	Cell View of Who Has Access	Spiral 4	Open	JFCOM		7/22/2002
JMSEL3 7	Provide ability to import Excel and Access tables for drop down lists	Import Excel and Access Tables	TBD	Open	JFCOM		7/22/2002
JMSEL4 7	When an Inject Cell sends an implementer to the training audience using the primary e-mail tool there must be an automatic blind copy of the e-mail and implementer sent to the JECG Chief Controller, MSEL Manager, and MSEL Tracker.	BCC MSEL Manager	TBD	Open	JFCOM		7/22/2002
JMSEL6 1	Establish a true "one-to-one" relationship between an individual record and the six-digit MSEL Event Number, not allowing duplicates of this number in a given database. While the program avoids exact duplicate event numbers by adding a numerical suffix t	Establish "one-to-one" relationship between record and six-digit MSEL Event Number	Spiral 4	Open	STRATCOM		10/15/2003
JMSEL6 2	Provide automated assignment and protection within the program for the six-digit MSEL Event Number. If the historical allocations of these numbers to individual commands and agencies is to continue, then the program should "guard" or protect the assigned	Provide automated assignment and protection within the program for the six-digit MSEL Event Number	Spiral 4	Open	STRATCOM		10/15/2003

JMSEL Tag	Requirement text	Name	Delivery	Status	Originator CMD	Originator Name(s)	Date Received
JMSEL80	Create a new user class for training audience MSEL Managers that would allow approval of applicants and editing of all events but would not allow modification of the drop downs. Training audience MSEL Managers need more authority than ordinary users, but	Create a new user class	Spiral 4	Open	JFCOM		10/15/2003
JMSEL91	When a MSEL Manager changes to a different exercise, the list of events for export should update. Presently, the list of events for export is based on the most recent data view generated by the Switchboard, regardless of exercise.	Update List of Events for export when MSEL Manager changes to different exercise	Spiral 4	Open	JFCOM		10/15/2003
JMSEL95	JMSEL should have a tool to remove POCIDs (DrafterID and UpdatedByID) from the events and Implementors in archived exercises so that those POCs can be deleted from the POC table. The MSEL Manager's POCID could be substituted. This information is not needed	Remove POCIDs (DrafterID and UpdatedByID) from the events and Implementors in archived exercises	Spiral 4	Open	JFCOM		10/15/2003
JMSEL96	JMSEL should show when each POC received access and whether that POC still has access to any exercise. It should offer the Administrator a convenient tool to delete unneeded POCs. JMSEL tends to accrete thousands of unneeded POCs. Excess names on the POC	Identify when each POC received access and whether that POC still has access	Spiral 4	Open	JFCOM		10/15/2003
